

Corporate Physical Climate Risk Scores

Four Twenty Seven's forward-looking data analytics empower investors to identify and mitigate risk in their portfolios. We score companies globally, across both developed and emerging markets.

For illustrative purposes only

6

Climate hazards assessed at the facility-level— floods, heat stress, hurricanes & typhoons, sea level rise, extreme water stress and wildfires

5,000+

Companies scored for Operations Risk, Supply Chain Risk and Market Risk

2 million+

Corporate facilities in our rapidly growing global database

Use Cases

- **Asset Owners** - evaluate the long-term risk exposure of your portfolio holdings and engage with management teams to foster investments in resilience.
- **Portfolio Managers** - incorporate equity scores into your portfolio construction and risk assessment .
- **Research Analysts** - understand long term exposures of companies, industries and sectors as a key component of future return performance.

Methodology

- Model exposure to a specific climate hazard from 2030 to 2040 and aggregate from the facility-level to company-level
- Capture current and future climate risk in countries that contribute to company value chains
- Assess company's dependence on natural resources threatened by climate change

Delivery Options

- Data feed subscription, refreshed regularly available via API, FTP, Excel
- Online, interactive dashboard with data visualizations
